PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in building **end-to-end machine learning systems**, including **data ingestion, validation, feature engineering, model training, evaluation, and cloud deployment**. Proficient in **Python, Scikit-learn, SQL**, and **MLOps practices** such as **CI/CD, Docker, MLflow**, and **cloud platforms (AWS/Azure)**. Experienced in automating analytics and ML workflows to deliver **scalable, production-ready solutions**.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2019 – 2023
ITER College (SOA University)
CGPA: 9/ 10

TECHNICAL SKILLS

Programming	Python (Pandas, NumPy, Scikit-learn, Matplotlib, Flask, Streamlit, Keras), SQL, Excel
Machine Learning	Supervised & Unsupervised Learning, Feature Engineering, Model Training, Evaluation
MLOps	MLflow, DagsHub, Docker, CI/CD, GitHub Actions, DVC
Cloud Platforms	AWS (EC2, S3, ECR), Azure Web App Services
Databases	MongoDB Atlas, MsSQL Server
Visualization	Matplotlib, Seaborn, Jupyter Notebook, Power BI
Soft Skills and others	Guitarist, Public Speaking, Stakeholder Communication, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

EY, Associate Consultant July 2024 – Present
Email Classification System – Enterprise MLOps Pipeline (Brazil Region)

- Designed and implemented an **end-to-end machine learning pipeline** with modular components including **Data Ingestion, Data Validation, Data Transformation, Model Training, Model Evaluation, and Model Deployment**.
- Built a robust **data ingestion framework** using **MongoDB Atlas**, structured **CSV pipelines**, and configurable **train-test splits**.
- Developed a **data validation layer** enforcing **schema consistency** and detecting **data drift** using **statistical distribution tests**.
- Automated **YAML-based data drift reports** to prevent **model degradation** in production.
- Engineered scalable transformations using **Simple Imputer, KNN Imputer, RobustScaler, and SMOTE-Tomek**.
- Implemented a **model factory pattern** to evaluate multiple **machine learning algorithms** with configurable **accuracy thresholds**.
- Enabled **reproducibility and traceability** using **artifact-based pipeline execution**.
- Containerized workflows with **Docker** and implemented **CI/CD pipelines** via **GitHub Actions**.
- Deployed models on **AWS EC2** using **ECR** for **production-ready inference**.

Employee Performance Analysis and Prediction

- Conducted **exploratory data analysis (EDA)** on large-scale **HR datasets** to identify key performance drivers and workforce trends.
- Engineered **numerical and categorical features** to improve **model interpretability** and **predictive accuracy**.
- Trained and evaluated multiple **machine learning models** including **Linear Regression, Random Forest, XGBoost, and CatBoost**.

- Applied **cross-validation** and **hyperparameter tuning** techniques to optimize model performance.
- Built **modular training and inference pipelines**, separating **data preprocessing**, **feature engineering**, and **prediction logic**.
- Delivered actionable insights enabling **data-driven HR decision-making**.

EY, Senior Analyst

July 2023 – July 2024

Excel / PPT Automation as a Service

- Delivered **18+ end-to-end automation solutions** using **Excel**, **VBA**, **Python**, and **SQL**.
- Handled complete Iberia-South America region reporting and Translated business requirements into scalable **automation-as-a-service** solutions through direct client collaboration.
- Reduced **manual effort and FTE dependency by 80–90%**.
- Improved **reporting accuracy**, **turnaround time**, and overall **operational efficiency**.
- Enhanced **maintainability and performance** of analytics workflows via modular VBA design.
- Enabled faster **data-driven decision-making** for leadership stakeholders.

EY, Engineering Intern

Feb 2023 – Jun 2023

Business Analytics

- Built a **POC** using **SQL** and **MS SQL Server** to perform **RFM (Recency, Frequency, Monetary) analysis**.
- Performed **data cleaning and preprocessing** to improve dataset quality.
- Developed interactive **Power BI dashboards** visualizing **KPIs** and business insights.
- Built a **time-series weather forecasting dashboard** in **Power BI**.
- Applied **advanced Excel techniques** including **pivot tables** and **Power Query**.
